PROJECTS

Almotimoon Landing page | Upwork

Technologies: [Angular19 - Typescript - Tailwind
Flowbite - AOS library]

- Collaborated with client to gather requirements and worked with team of 3 frontend developers.
- Implemented 8 reusable, responsive UI components (about section, insights section, meals page and blogs page).

Soukna Masry landing and dashboard projects

Technologies: [Angular - TypeScript - Figma]

- Built core landing page sections (Hero, Blog Details, Contact) with Angular, improving mobile responsiveness and reducing bounce rate by 25%.
- Designed bilingual UI (Arabic/English) using Angular i18n, ensuring 100% translation coverage.
- Collaborated with a UI/UX team of 3 designers, applying their feedback to improve usability and visual consistency.
- Used Figma to implement the dashboard Home Page design, achieving 95% design-to-code accuracy while deepening my understanding of UI principles through hands-on development.

Valu landing page Clone

Technologies: [Angular 17 - Angular Material
Angular Animation - Bootstrap - Typescript]

- Developed a dynamic, responsive landing page with custom animations, interactive product features, and seamless user experience enhancements.
